EMTEQ® Selected by Goderich Aircraft Inc. for MD-87 VIP Completion Program

New Berlin, Wis. – Goderich Aircraft Inc. has selected EMTEQ for the MD-87 (DC-9-87) VIP completion program. EMTEQ will support Goderich as a complete system integrator providing a variety of products and services including the SkyPro™ – The Advanced Connectivity and Productivity Solution (IFE / Cabin Management / Productivity System), LED interior lighting, integration engineering support, and FAA certification services. The aircraft is being completed for a private client to deliver by the end of this year.

Goderich Aircraft Inc., an international luxury aircraft refurbishment business, has developed a reputation of excellence. Their extensive conversion experience has allowed Goderich Aircraft Inc. to rise to the top as a destination for the most discriminating buyers.

Andy Orr, Goderich Aircraft Inc's Vice President of Sales commented, "We are thrilled to work with EMTEQ. We went with EMTEQ as they provide outstanding customer service and proven products. We hope to do many more projects with them as our relationship continues to evolve."

"We are excited to further expand our capabilities and product offerings with Goderich," said Jeff Rozewicz, EMTEQ Director of Sales and Engineering. "This is another step toward building our long-term relationship in an effort to better serve our customers."

A major force in introducing LED interior lighting to the aviation community, EMTEQ has built upon this cabin experience to include complete cabin control, in-flight productivity and entertainment, cabin power and seat heating. EMTEQ will provide 115 VAC high intensity LED wash lighting, LED reading and table lights, air gaspers and power outlets.

EMTEQ will also provide SkyPro™ – The Advanced Connectivity and Productivity Solution. This ground-breaking system is designed with three very fundamental, yet important principles in mind: flexibility, ease of installation, and integration of cutting edge technologies. The system for the MD-87 completion will include a HD video system for a multiple stateroom VIP configuration with optional AVOD and iPod® docking stations, digital audio with noise cancelling headphones, SkyShow Moving Map system, and cabin control systems.

-more-

With a complementary blend of avionics, structural, interior, and systems engineering and technical skills, EMTEQ will also provide engineering design and support for the IFE/CMS integration, power distribution (cabin outlets), smoke detection, wash, dome and reading lights, passenger signs, emergency lights, oxygen and the True North satellite system.

About EMTEQ and Its Partners

Incorporated in 1996, EMTEQ is a comprehensive solution provider, specializing in avionics systems and integration, interior lighting and cabin comfort, and exterior lighting products for retrofit and forward fit applications in the military, corporate, HOS/VIP, helicopter and air transport markets. To complement this product offering is EMTEQ's unsurpassed design, certification and consulting services. From electrical and mechanical design to interior reconfigurations, FAA certification services, Transport Canada document processing and interpretation, and technical support, EMTEQ delivers innovative products and responsive service on every program. Today, EMTEQ employs 430 people and operates its headquarters from a state-of-the-art, PMA and AS9100 57,000 sq. ft. approved facility in New Berlin, Wisconsin, with worldwide offices and manufacturing facilities in Florida, Winnipeg, Canada, Taubaté, Brazil, and Bachenbülach, Switzerland. EMTEQ also holds a strategic partnership with Cable Technology in Great Falls, Montana. Learn more about EMTEQ and its partners at www.emteq.com, www.acs-nai.com, and www.cteq.com.
