Bombardier Grants EMTEQ Two Prestigious Supplier Awards

New Berlin, WI, USA (March 11, 2010) – During a Bombardier Learjet Supplier Symposium on February 2, 2010, EMTEQ was issued an award for Best Overall Performance for the Learjet 85 program.

In addition, Bombardier granted EMTEQ an award for Supplier Under Weight Target. All products being developed by EMTEQ for the Learjet 85 platform are under the “not to exceed” weight requirements set by Bombardier.

“This award is a testament to the strength of the Bombardier and EMTEQ partnership,” said Josh Schermerhorn, EMTEQ Program Manager for the Learjet 85 program. “Without teams on both sides working extremely hard, the progress we made over the last two years would not have been possible.”

EMTEQ is supplying interior lighting, exterior lighting, cabin power, electronic junction boxes, and an emergency lighting system for the Learjet 85 aircraft. From providing products on past Learjet aircraft, such as the Learjet 40, Learjet 45 and Learjet 60 XR, EMTEQ strives to continue designing the most innovative and quality products for Bombardier on its latest platform.
