Easy HD – The Next Level of CMS Customization

SkyPro™ Integrates High-Definition Enhancing Existing Cabin Management Systems (CMS)

New Berlin, WI, USA – SkyPro™, the Advanced Connectivity & Productivity Solution, introduces the next level of CMS customization and versatility: Easy HD. This innovative approach provides customers with High-Definition components that work independently of the existing CMS, requiring little to no modifications to your aircraft's existing CMS. With six standard package options and a wide array of additional components to choose from, integrating High-Definition is simple, fast, and scalable to customer and aircraft requirements.

“Easy HD is the perfect solution to add HD entertainment to any aircraft on the market,” states Cory Wasniewski, SkyPro Product Manager. “It offers the same type of HD entertainment available in your home. With the scalability of the SkyPro system, we can achieve any level of aircraft integration to balance the cost of installation with a full array of cabin management and in-flight entertainment features.”

Existing analog bulkhead monitors are replaced with SkyPro™ HD monitors, ranging anywhere from 10.4” to 64” in size. Play Blu-Ray discs (MPEG 2, VC-1 and H1 264 (AVC)), DVD-Video, DVD-Audio, Dolby Digital, PCM, MP3, CD-DA, DVD-ROM, DVD-R, DVD-RW, CD-R, CD-RW from the SkyPro™ HD Media Player or utilize your existing analog source equipment. Audio is played through your existing audio system, or you can replace or upgrade your audio system with SkyPro's speaker and digital surround sound options.

Upgrade the CMS/IFE on your aircraft while staying within your budget. Whatever your configuration, these packages are the best HD upgrade solutions available on the market. For more information visit www.skypro-cps.com, or contact us at 262-679-6170 or sales@skypro-cps.com.

About EMTEQ and Its Partners

Incorporated in 1996, EMTEQ is a comprehensive solution provider, specializing in avionics systems and integration, interior lighting and cabin comfort, and exterior lighting products for retrofit and forward fit applications in the military, corporate, HOS/VIP, helicopter and air transport markets. To complement this product offering is EMTEQ's unsurpassed design, certification and consulting services. From electrical and mechanical design to interior reconfigurations, FAA certification services, Transport Canada certification services, and technical support, EMTEQ delivers innovative products and responsive service on every program. Today, EMTEQ employs 400 people from a state-of-the-art, AS9100 and FAA PMA approved 57,000 sq. ft. facility in New Berlin, Wis., with worldwide offices and manufacturing facilities in Florida, Winnipeg, Canada, Taubaté, Brazil, and Bachenbülach, Switzerland.
