EMTEQ Launches eConnect™ Plus Program

New Berlin, Wis., USA (October 2013) – EMTEQ is introducing the eConnect™ Plus Program.

This program provides equipment discounts and enhanced customer service incentives for eConnect installations on new platforms. EMTEQ will sponsor and support the STC approval to expand the product's STC portfolio. "We're confident that if eConnect is in the right hands, it will be the most popular system on the market," said product manager Greg Cornell. "Having an extensive portfolio of STCs available will make it all the more easier to install."

eConnect is a flexible and versatile system offering EASYHD™ and Connectivity solutions in as little as 2-6 weeks.

EASYHD by eConnect brings high definition to the aircraft through a cost effective upgrade integrating into the existing system providing wireless control with personal electronic devices.

Connectivity by eConnect is a wireless router allowing access to the aircraft's SATCOM system throughout the cabin with advanced business applications and software for increased throughput and decreased data costs.
