Rockwell Collins expands Venue's third party solutions to include EMTEQ as preferred LED Lighting Supplier

New Berlin, Wis., USA (March 2011) – Rockwell Collins today announced an agreement with EMTEQ to fully integrate EMTEQ's line of light-emitting diode (LED) interior lighting with its [Venue™ HD Cabin Management System](#). The agreement will enable authorized Rockwell Collins dealers to select integrated LED lighting directly from EMTEQ.

"The beauty of Venue is its ability to accommodate the latest technology with relative ease, which we're proving again by integrating it with EMTEQ's lighting products," said Tommy Dodson, vice president and general manager, Cabin Systems for Rockwell Collins. "EMTEQ's state-of-the-art LED lighting and its sleek look are what customers are looking for in a Venue-fitted cabin."

Rockwell Collins' agreement with EMTEQ enhances the variety of choices Venue customers now have for aftermarket cabin lighting. EMTEQ's LED lighting utilizes the latest technology to enable optimal output and superior color consistency. Its ease of installation, operation and customization options makes it a perfect fit for Venue platforms.

"EMTEQ is very excited to collaborate with Rockwell Collins to allow for a seamless Cabin Management System and lighting integration" said Cory Wasniewski, EMTEQ's Cabin Systems Integration Manager. "We believe this will significantly improve speed to market and provide a smoother integration with modern controls for EMTEQ's lighting product families."
